

LimnTech Scientific Names Greg Driskell as its Chief Operating Officer

09/05/23, Souderton, PA – LimnTech Scientific, a leading developer and supplier of Road Safety Infrastructure related technologies, is delighted to announce the appointment of Greg Driskell as its Chief Operating Officer (COO). This strategic move signifies a significant milestone in the company's mission to advance road safety infrastructure technologies and protect the lives of road workers.

Greg Driskell brings over three decades of industry expertise and a stellar reputation for designing, developing, manufacturing, and distributing solutions that enhance the safety of road users. His experience and leadership within the road safety infrastructure industry, both domestically and internationally, make him a valuable addition to the LimnTech team.

In his role as Chief Operating Officer, Mr. Driskell will play a pivotal role in shaping the future of LimnTech Scientific. His vision for the company is centered on innovation, excellence, and a strong commitment to creating a positive and safety-focused culture.

"I am excited and honored to have the opportunity to come alongside the talented team at LimnTech," said Greg Driskell. "I see great potential in their technology, and I look forward to playing a key role in developing LimnTech into a leader of road safety infrastructure technologies. We share a similar ethos of creating a business with an exceptional culture that effectively contributes to the safety of those that work on and use our roads every day."

Doug Dolinar, President of LimnTech Scientific, expressed his enthusiasm for the new appointment, "We are thrilled to have Greg join our team. We believe that by combining our excellent team with Greg's experience and leadership within and around the industry, we are poised to make a great impact on road safety for all those that work on or use them."

LimnTech Scientific is renowned for its LifeMark auto layout and pavement marking maintenance systems, offering cutting-edge solutions to safeguard the lives of road workers and enhance road safety infrastructure. With the addition of Greg Driskell as COO, the company is primed to continue its mission of innovation and excellence in the field.
