

SOLO
SPEED OF LIGHT OPTICS

Adjust Where Your Lines Go.

Line Smoothing and Snapping

allows existing markings to be reproduced better than ever. Simply record with any LifeMark® system and let Speed of Light Optics handle the rest.

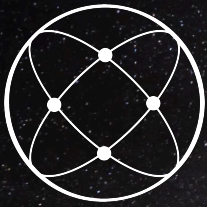

Lane Offsets enable you to layout virtual lines that were missed when recording.

Line Length Adjustments.

Was a marking worn when recorded? Let us patch that together! Was a lane line too short? We can fix that too!

Planset Conversion to LifeMark® Job. Did the contractor or DOT supply a CAD file? We can turn that into a file you can layout!*
